

INTELLIGENT CONTENT AND DEVICE MANAGEMENT

VisionInfo from Hisense is our cloud-based digital signage software which is flexible, cost-effective, and infinitely scalable for users. VisionInfo includes a comprehensive CMS solution and advanced remote display management features. It provides users the freedom to edit and publish content while ensuring it looks great across all displays in a system. It is a powerful, effective and easy to use tool to manage content and control your displays at anytime from anywhere.

Highlights

Content Creation

Utilise the powerful features within the VisionInfo platform to create, publish, and manage digital content, empowering users to produce and distribute engaging materials for their audience.

Drag-and-Drop Visual Editor

Utilise the drag-and-drop feature within the VisionInfo platform to view and organise widgets, videos, images, webpages, weather reports and clocks. Users can then easily drag and drop input media and sources into the layout.

Content Publishing

VisionInfo makes it effortless to create, edit and organise digital content within our CMS platform. Users have full control making content available to the intended audience through a simplified publishing process.

Data Analysis

This module enables interpretation of the data generated within the VisionInfo platform. This includes analysing engagement and device behaviour to gain insights into content performance and audience preferences. This analysis helps inform content strategy and decision-making to enhance user experience.

Visual Reporting

VisionInfo presents data and analytics in a visual format, such as charts, graphs, and interactive dashboards. It enables users to easily understand and interpret complex data sets related to content performance, audience metrics, engagement levels, and other key indicators.

Routine Automation

Routine automation within VisionInfo allows users to create automated processes within the software to streamline repetitive tasks and workflows. It involves interactive tools to automate content publishing, updating applications and display maintenance. This dramatically improves efficiency and ensures consistent quality across the CMS environment.

Remote Monitoring and Control

Remote monitoring within VisionInfo allows users to track and monitor the status, settings and health of any display within an installation. This includes monitoring key metrics such as uptime, content delivery, user activity and security.

Error Notifications

Error notifications are a vital element within any remote system allowing users to be notified instantly when an error or issue occurs within the CMS environment.
