# PREPARING FOR THE NEXT PHASE OF HOSPITALITY INDUSTRY

## The Hospitality Industry's Next Chapter

Of all the industries, hospitality has been hit the hardest by the pandemic. Guest behavior has changed so drastically that the attributes of choosing hotels and what was once expected of them, are no longer recognizable. They are looking for personalized services while minimizing face-to-face interactions. The hospitality industry must cater to these delicate and sensitive needs of guests while also dealing with the shortage of staff due to COVID realities.

## Introducing "Pro:Centric Cloud"

We believe the solution lies in digital transformation. LG's Pro:Centric Cloud solution is a powerful yet convenient cloud-based solution that allows for integrated management. With this solution, hotel managers can systematically control customized contents and interactive services. By providing more targeted messages with programs void of physical limitations, hotels can position their brand identity and minimize operational hassles.

Improve Brand Image and Identity

Build Easy-to-Use Experiences for Guest

Improve Operating Efficiency & Employee Productivity

Wireless and Contact-Free Site Management

Simplicity

Easy and quick deployment with less cost

Scalability

Customizable and easy to integrate APIs

Flexibility

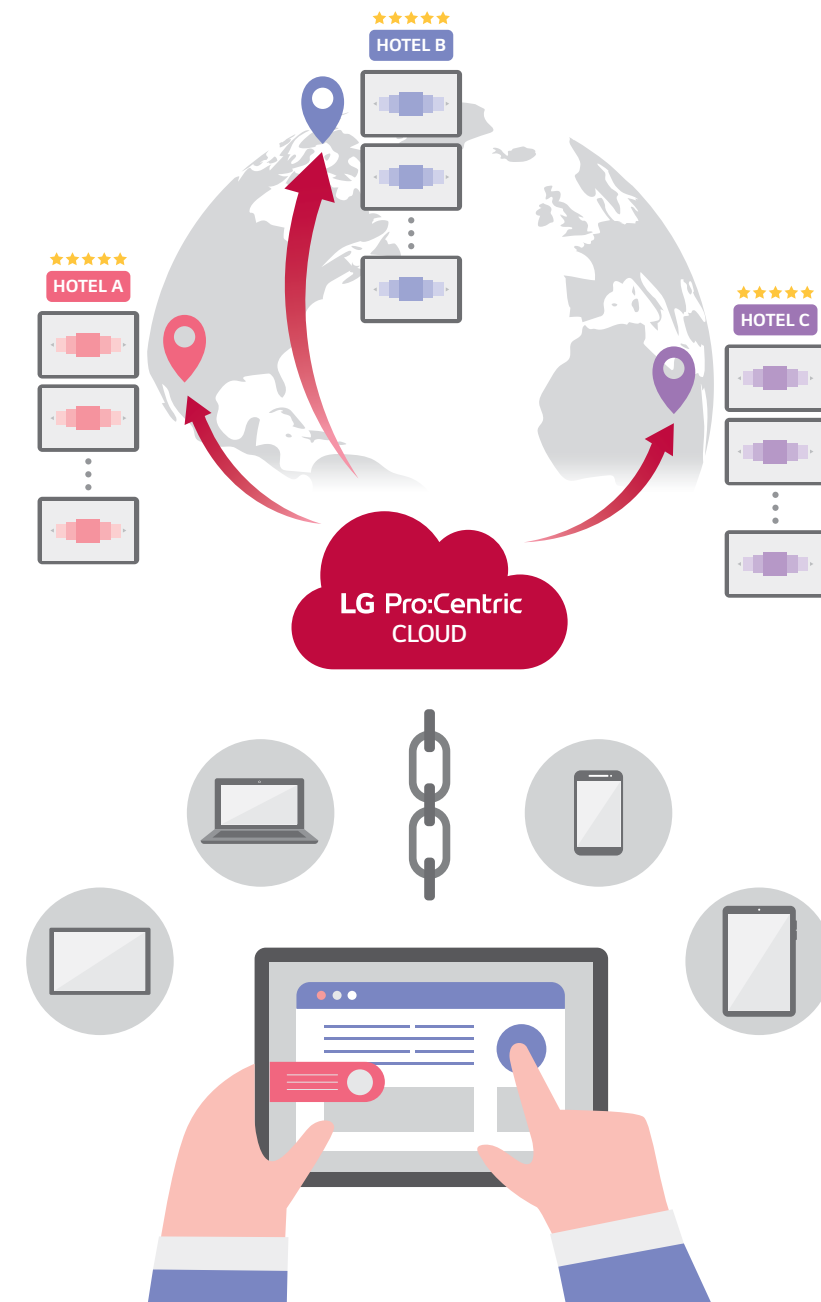

Work from anywhere, anytime, from any device while connected to the Internet

Recency

Updates, patches and fixes are installed automatically and regularly

# WORLDWIDE SITE MANAGEMENT

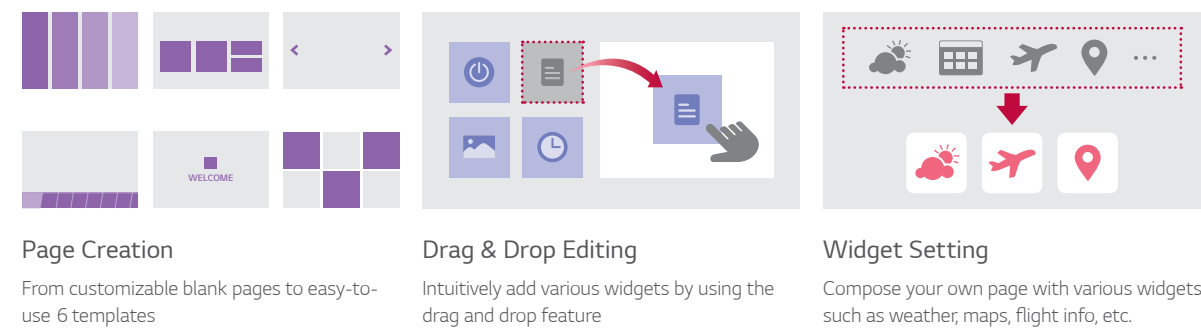

Many prestigious hotel brands have hotels and resorts in all corners of the world. A critical function for management is to maintain synchronous and consistent communication across multiple branches. With LG Pro:Centric Cloud, multiple properties around the globe can be managed comprehensively regardless of where the manager is located.\* An Internet-connected device is all that is needed to control various establishments. Also, a common problem with integrated administration authorization, can easily be solved with LG Pro:Centric Cloud's multilevel authorizations that allow the assigning of authorizations to suit different managerial roles.

\* This service requires Internet connected LG hotel TVs manufactured after June 2021 with LG webOS 5.0 or higher.

# EFFECTIVE CONTENT MANAGEMENT

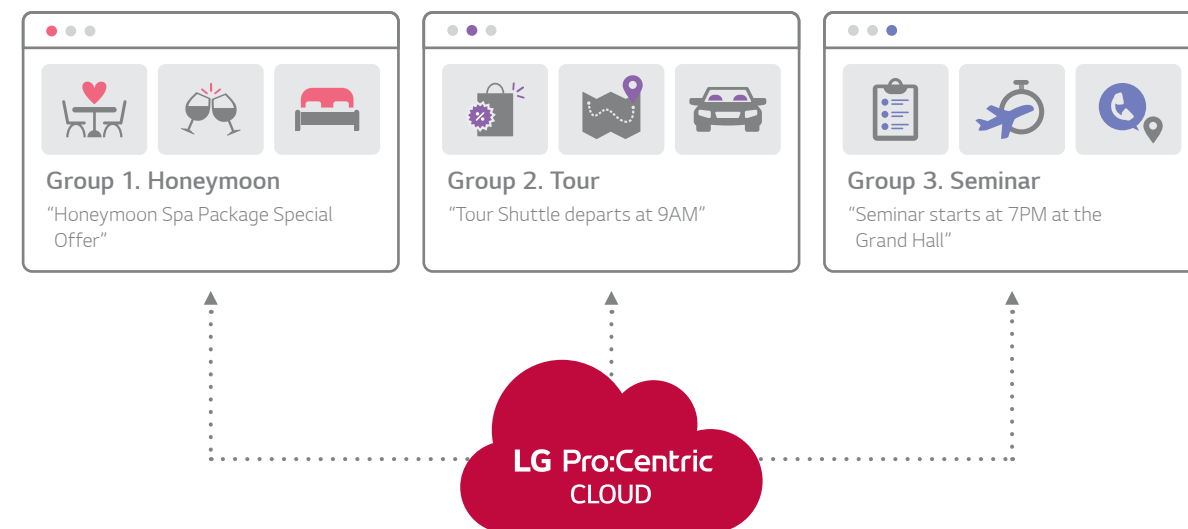

## Simple and Easy UI Management

Pro:Centric Cloud's intuitive editing tool allows users to easily put together intriguing screen images with various template options and widgets. The ideal design becomes easier than ever since everything from choosing fonts and changing sizes, inserting images and video clips, to applying various animation effects can be done with the simple drag and drop functionality.

## Flexible Group Management

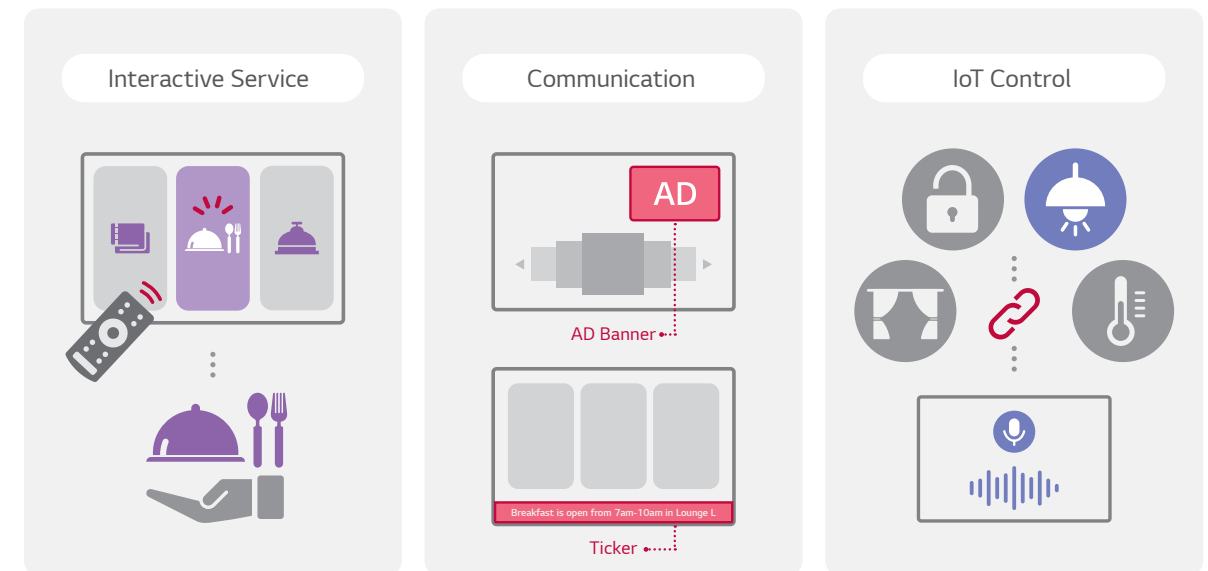

Hotel managers can coordinate in-room TV channels to fit each guest. Different channels and messages can be provided to each group according to their preferences, purpose of visit, room grade, etc.\* Not only that, special promotions and notices can be sent to select groups with customized services and more effective marketing.

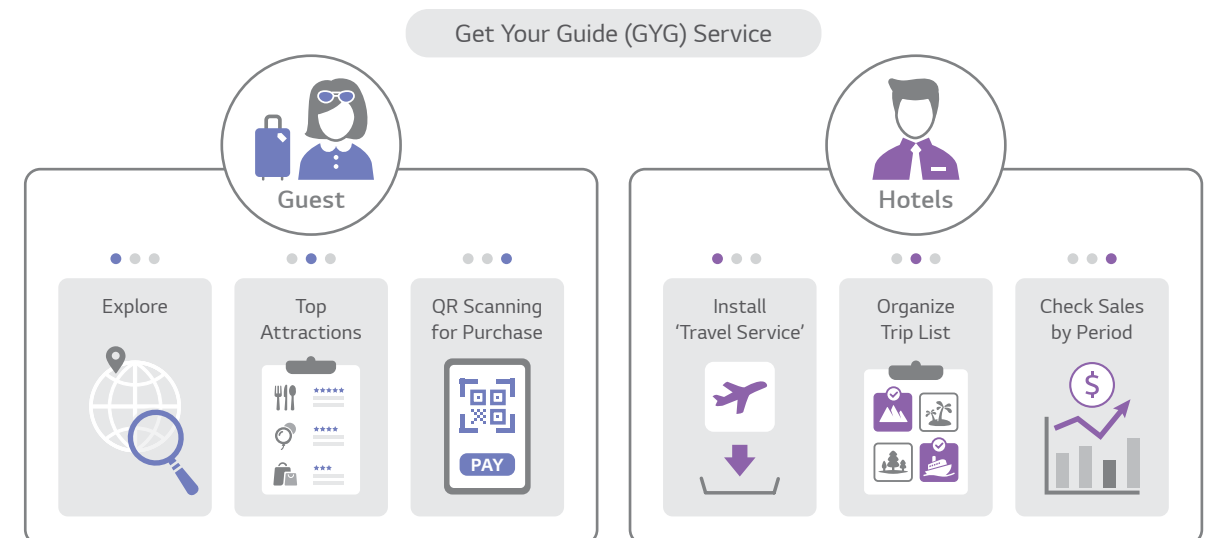

\* LG Pro:Centric Cloud does not collect any personal information of guests as a tool that helps hotels to group rooms and manage tailored contents.

## Specialized Guest Services

Guest experiences become more tailored and interactive. Guests can send messages to the front desk via in-room TVs, which allow them to make requests without leaving the room or having to wait on the phone. Hotels can also provide customized information to serve each guest's interests. Managers may set the communication schedule to reach the target easily and effectively. With LG Pro:Centric Cloud, hotel rooms can be automated by connecting various in-room devices to an IoT capable TV. Guests can choose to use the remote control or the voice recognition feature to control each device.

LG Pro:Centric Cloud works hand in hand with third-party service providers to offer various solutions directly to guest rooms like the "GYG (Get Your Guide) Trip Service". This service provides guests with a wide range of local tour packages and excursion programs via in-room TVs, helping guests to discover information and make purchases\* from their rooms. Hotel managers can arrange trip lists and check the sales status by period.

\* Purchases can be made via a guest's phone by scanning the QR code on the TV to access purchase links.
