

The background of the entire page is a photograph of a modern shopping mall interior. On the left, a woman with long dark hair, wearing a black top, a yellow cardigan, and blue jeans, is walking and talking on a mobile phone. She is carrying several shopping bags. On the right, a large digital display shows a woman with blonde hair wearing large, round sunglasses and a green lace crop top. The display has the words 'HOT BOOK' and 'COOL PR' visible. The mall has a high ceiling with a glass skylight and modern lighting fixtures.

Signage solutions, LED displays and Professional TVs

Tailored tech solutions **for better business**

Better with Philips professional displays

Power and versatility are only the beginning. Every innovation from PPDS is designed for maximum impact.

Over 40 years' one-on-one industry experience with small businesses through to global enterprises gives us the insight and the experience to develop breakthrough technologies when and where they are needed – from cutting-edge professional TVs, through collaboration-focused interactive displays and ultra-clear high brightness smart signage, to limitless direct view LED displays.

Signage collection

Crisp colour and ultra-clear resolution bring content to life for flawless engagement and better results. Built for versatility and packed with features that can be easily adapted for your usage needs.

Interactive range

Inspire collaboration, maximise engagement and empower true connections between people and your content. All featuring super smooth multi-touch functionality and powerful business features.

Direct view LED line up

Display content as its meant to be seen. Adaptable and flawlessly flexible, build out captivating small corners, show vibrant content in shop windows, and engaging masterpieces in larger-than-life detail.

Videowall array

Size up for the bigger picture. Turn your content into an immersive and customise your commercial setting into unforgettable visual feast. Bring dynamic content to life with added intrigue and real radiance.

Professional TV portfolio

Deliver the ultimate home-from-home experience for hotels, healthcare settings and beyond. Designed on our Android TV platform for smart familiarity, cutting-edge versatility and maximum engagement.

Android™

Secure, non-rooted SOC built-in

The operating system on a device is one of the most important elements in terms of providing a stable and secure environment for applications to perform tasks. Choosing solutions with an integrated Android operating system offers a competitive edge – both cost-effective and with a wide range of software options available.

Philips professional displays incorporate a built-in, non-rooted Android SoC – designed for flexible and agile content management and your system security.

Infinite possibilities for better business

Engage, inform and create with ease. When you choose a Philips professional display powered by Android, you'll experience infinite possibility.

With intuitive access to millions of apps from the Google Play store, you'll also be able to connect your tailor-made apps and software for a truly unique customer experience on your Android TV*.

Powered by
android 

*Android TV and Google Play store are only available on Philips B-line series

Do more with Android

Give your clients more ways to enjoy their time in front of your screens.

Make a positive impression as a techforward company enabling tailored experiences.

Enjoy better connectivity with your existing systems without additional costs.

Open-source design allows you to create custom apps for any purpose.

Secure updates keep your Google-certified products up-to-date, optimised and protected.

PPDS Wave

Your evolutionary cloud platform unlocking the power, versatility and intelligence inside Philips professional displays.

Made for and in collaboration with system integrators

You spoke and we listened. PPDS Wave is your state-of-the-art cloud platform, dedicated to bringing secure and scalable, sustainable bottom line benefits for your business.

Integrating different types of hardware can be challenging, sending service technicians is costly, and displays are not always accessible. Wave puts you fully in control with simplified installation and display set-up, including managing, monitoring, and controlling displays, upgrading firmware, managing playlists and setting power schedules. Allowing you to save time, energy and environmental impact.

The Wave platform is...

- > Scalable
 - > Future-proofed
 - > Secure
 - > Easy-to-use
 - > Easy-to-integrate (API First)
 - > Continuously developing and evolving
-

Your sustainable solution for a sustainable future

In a world where resources are precious and overheads are rising, the ability to avoid costly on-site interventions and manage displays efficiently is no longer just a nice-to-have...it's critical.

With PPDS Wave you can be proactively alerted to issues, helping you to avoid costly truck-rolls, saving

on time and energy, while reducing your carbon footprint, too. Wave also offers options to optimise your fleet's energy usage - for instance by scheduling standby when a display is not in use.

Register for your free trial
at ppds.com

Save your energy with PPDS Wave on any Philips professional displays showing this Wave-ready logo.

CMND

Take command of your content

Optimise your on-screen content with our exclusive PPDS CMND on-premises solution. Philips professional TVs that feature CMND put you in total control, with powerful content creation, advanced system connectivity and pro-grade deployment, all through an easy-to-use intuitive interface.

Do more with CMND

Update your entire fleet of screens, selected sectors or single units with CMND.

CMND & Create provides easy-to-use tools and templates to design and publish custom content.

CMND & Control allows you to manage inputs and monitor display status over a local connection.

CMND & Check-in streamlines processes and adds a special touch with personal guest communications.

CMND Reception

CMND Reception is a versatile new software application, developed as part of the CMND portfolio, bringing you the opportunity to seamlessly build upon your small to medium-sized hotel customer's existing CMND platform to provide a viable and cost-effective alternative to checking guests in and out with a full, end-to-end Property Management System (PMS).

Deliver PMS-based services, such as enabling video-on-demand, including Netflix, or greeting the customer upon entry.

CMND Reception – bringing efficiency and opportunity for your business, and greater control for your customers.

Philips B-Line

Professional productivity

Philips D-Line

Captivating innovation

Powered by Android

Amaze your guests with a smarter, faster signage display. Performance meets versatility in the Philips D-Line - 24/7 and ranging up to 98 inches in size, it is the perfect choice for content that needs to make a powerful impact in both landscape and portrait orientation. With integrated WiFi and designed for running Android apps, meet the next evolution in signage solutions.

32"	43"	50"	55"
65"	75"	86"	98"

Public venues

Inform and engage visitors in public spaces. The Philips D-Line features an integrated system to communicate with devices over the same network connectivity. FailOver ensures that backup content is played if the primary source experiences an outage.

Retail

Optimise any retail space for a better shopping experience. Easily create and control promotional content across single or multiple displays with Wave, and ensure content is always playing in case of primary source outages with FailOver.

Corporate

Easily connect and share content for ultra-efficient meetings and presentations. Built-in Android and SmartBrowser provide access to more apps, media content and devices, while Wave allows for updateable internal communications in an instant.

Food and beverage

Easily display menus, update item availability, pricing, and promotions with Wave. Integrated SmartPlayer and internal MemoryCache allow for local content scheduling, while FailOver ensures backup content is always available.

Transportation

Instantly update arrivals, departures and important announcements with ease using Wave. Built-in Android allows for live information and custom software integration from apps, while FailOver displays backup transport information in case of a primary source outage. All this with 24/7 operation.

* sizes/models may be regional dependent

Hospitality

Set a premium impression with a customisable welcome page, boost revenue with the MyChoice* pay-to-view solution, and quickly configure additional TVs with USB cloning. The EasySuite series keeps operational costs down with low power consumption, whilst CMND & Control provides remote management of displays without guest disturbance.

With MyChoice offer pay-to-view content in any situation from a complete pay-to-access-all-channels model to selected premium content.

* MyChoice is an integrated solution that allows viewers to access pay-per-view channels via a code.

Features

Philips Bedside TV

Professional healthcare wellbeing

With Chromecast built-in™

Comfort patients with a home-from-home entertainment option with the new Philips Bedside TV. Designed for healthcare environments, this medical-grade 19-inch display delivers advanced connectivity, a customisable interface, and antimicrobial housing for superior patient protection.

19"

Healthcare

An antimicrobial case minimises the spread of germs and allows for easy cleaning, while nurse-call system compatibility allows easy control of the TV and access to medical assistance from a single device.

CMND enables instant patient information updates, and Chromecast built-in helps keep a comfortable setting by allowing patients to cast content from their mobile devices.

Galvanic isolation ensures a fail-safe separation of the headphone connector from the electrical environment near the patient's bed.

A reading light is conveniently placed under the bottom bezel of this Philips professional healthcare TV, giving patients the freedom to read - day or night. The light is operated by a button on the front touch control panel: the button illuminates when a finger or hand is near it.
