Tailored tech solutions for better business

Better business vision with Philips Professional Displays

Quality and versatility are just the beginning. Innovation and power come as standard. Total solutions from PPDS – designed for maximum impact and return on investment.

Over 40 years of experience working across the industries with small businesses through to global enterprises has enabled us with the insight and the expertise to develop breakthrough technologies. Brought to market when and where they are needed - from world-first, sustainability-focused new technologies, cutting-edge professional TVs, through collaboration-focused interactive displays, smart signage and videowalls, to limitless direct view LED displays. The full range is here to discover with Philips Professional Displays.

innovation  you

Signage collection

Crisp colour and ultra-clear resolution bring content to life for flawless engagement and better results. Built for versatility and packed with features that can be easily adapted for your usage needs.

Interactive range

Inspire collaboration, maximise engagement and empower true connections between people and your content. All featuring super smooth multi-touch functionality and powerful business features.

Direct view LED line up

Display content as its meant to be seen. Adaptable and flawlessly flexible, build out captivating small corners, show vibrant content in shop windows, and engaging masterpieces in larger-than-life detail.

Videowall array

Size up for an unforgettable bigger picture. Turn your content into an immersive and customised visual feast. Bring dynamic content to life with added intrigue and real radiance.

Professional TV portfolio

Deliver the ultimate home-from-home experience for hotels, healthcare settings and beyond. Designed on our Android TV platform for smart familiarity, cutting-edge versatility and maximum engagement.

Enabling next level business vision

Android™

Secure, non-rooted SoC built-in

The operating system is one of the most important elements on any device, providing a stable and secure environment for applications to perform tasks. Choosing a display solution with an integrated Android operating system offers a competitive edge – cost-effective and with a wide range of software possibilities.

Philips Professional Displays with an integrated non-rooted Android SoC are designed for professional settings, delivering flexible and agile content management and system security.

Infinite possibilities for better business

Whether on digital signage or an Android TV*, engage, inform and create with ease. When you choose a Philips Professional Display that is powered by Android, you will gain infinite possibilities.

With intuitive access to millions of apps from the Google Play store, you will also be able to connect your tailor-made apps and software for a truly unique customer experience.

Powered by
android 

*Android TV and Google Play store are only available on Philips B-line series

Do more with Android

Give customers more ways to enjoy time in front of your displays.

Make a positive impression as a techforward company enabling tailored experiences.

Enjoy better connectivity with your existing systems without additional costs.

Open-source design allows you to create custom apps for any purpose.

Secure updates keep your Google-certified products up-to-date, optimised and protected.

Your evolutionary cloud platform unlocking the power, versatility and intelligence inside Philips Professional Displays. Made for and in collaboration with system integrators.

State-of-the-art remote device management

PPDS Wave is the evolutionary cloud platform, dedicated to bringing secure and scalable, sustainable bottom line benefits for business.

Integrating different types of hardware can be challenging, Sending service technicians is costly. And displays are not always accessible. PPDS Wave puts you fully in control with simplified installation and display set-up, including managing, monitoring, and controlling displays, upgrading firmware, managing playlists, and setting power schedules. Allowing you to save time, energy and environmental impact.

Your display solution for a sustainable future

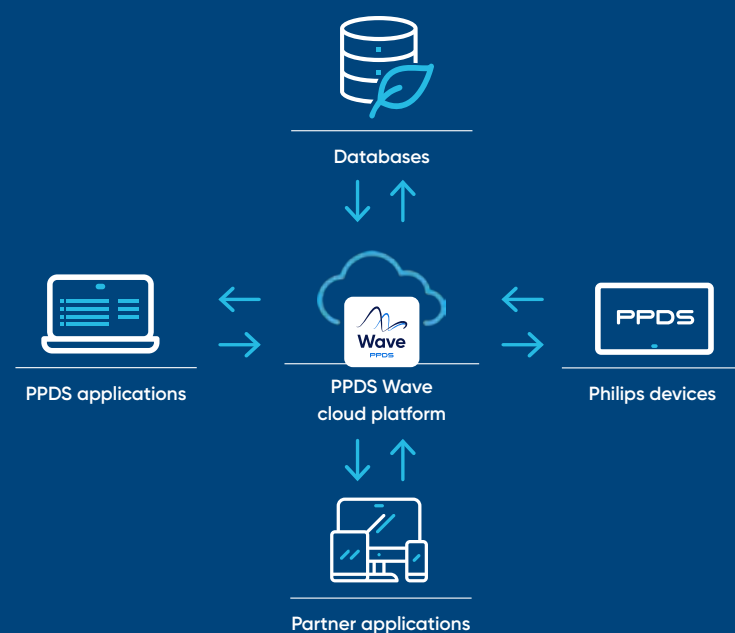

In a world where resources are precious and overheads are rising, the ability to avoid costly onsite interventions and manage displays efficiently is no longer just a nice-to-have... it is critical.

With PPDS Wave you can be proactively alerted to issues, helping you to avoid costly truck rolls, saving time and energy, while reducing your carbon footprint, too. Wave also offers options to optimise your fleet's energy usage — for instance by scheduling standby when a display is not in use.

What is PPDS Wave?

- Scalable
- Future-proofed
- Secure and easy-to-use
- Easy-to-integrate (API first)
- Continuously developing and evolving

Wave Controller

Manage and control your professional displays remotely.

An essential application for your daily workflow

- Manages your displays proactively and remotely
- Works with different display hardware and generations so you can focus on innovation and not compatibility
- Reduces the need for onsite display interventions and costly truck rolls
- Allows you to proactively service displays without interruptions or travelling to site
- Enables you to scale integrations with a cloud native solution.

Wave Creator

Create basic content using images, video, text and more.

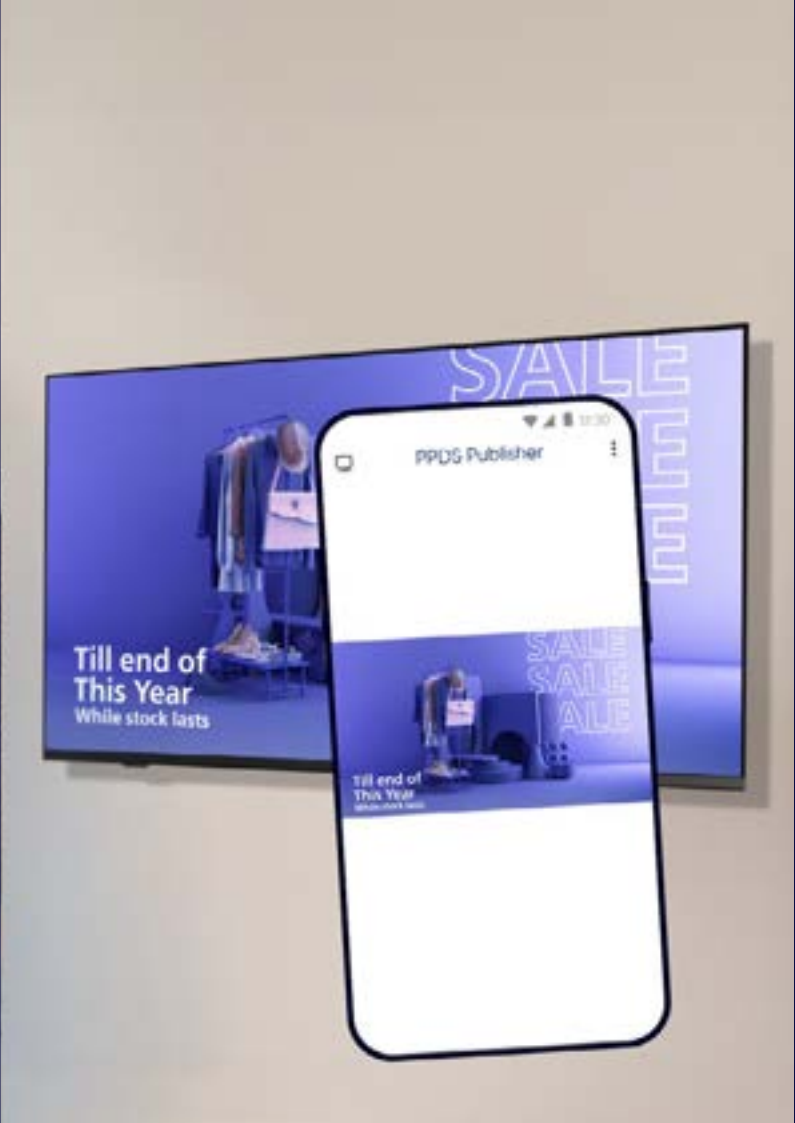

A straightforward tool for creativity and inspiration

- Create beautiful content of your own or adapt professional templates
- Easily change menus and signage on the fly with simple text editing
- Simple to use drag and drop interface, preloaded templates and integrated widgets
- Schedule and blend different media over different times, days
- Seamlessly integrates with Wave Controller claiming and display settings
- We manage the back-end servers, redundancies, and backups.

PPDS Publisher

Intuitive, easy-to-master content creation and control for your Business TV

PPDS Publisher is the intuitive app for your own devices, designed to bring you effective and efficient content creation, scheduling and control for your Philips Business TV.

Retail

For independent boutiques and stores, PPDS Publisher on your Philips Business TV brings versatile customer communication to your fingertips. Show your latest offers. Work your messaging to the weather. And welcome in your latest ranges with ease.

Food and beverage

Keeping your customers entertained keeps them at your venue for longer. Adapt the messaging around the TV channels you are showing with the easy-to-use templates all ready for you in PPDS Publisher. Ensuring they keep coming back for more.

Public venues

From golf clubs and gyms to spas, surgeries, and more, your Philips Business TV brings a versatile display solution to communicate with your customers and keep them entertained. And now you can keep your messaging up-to-the-moment with PPDS Publisher.

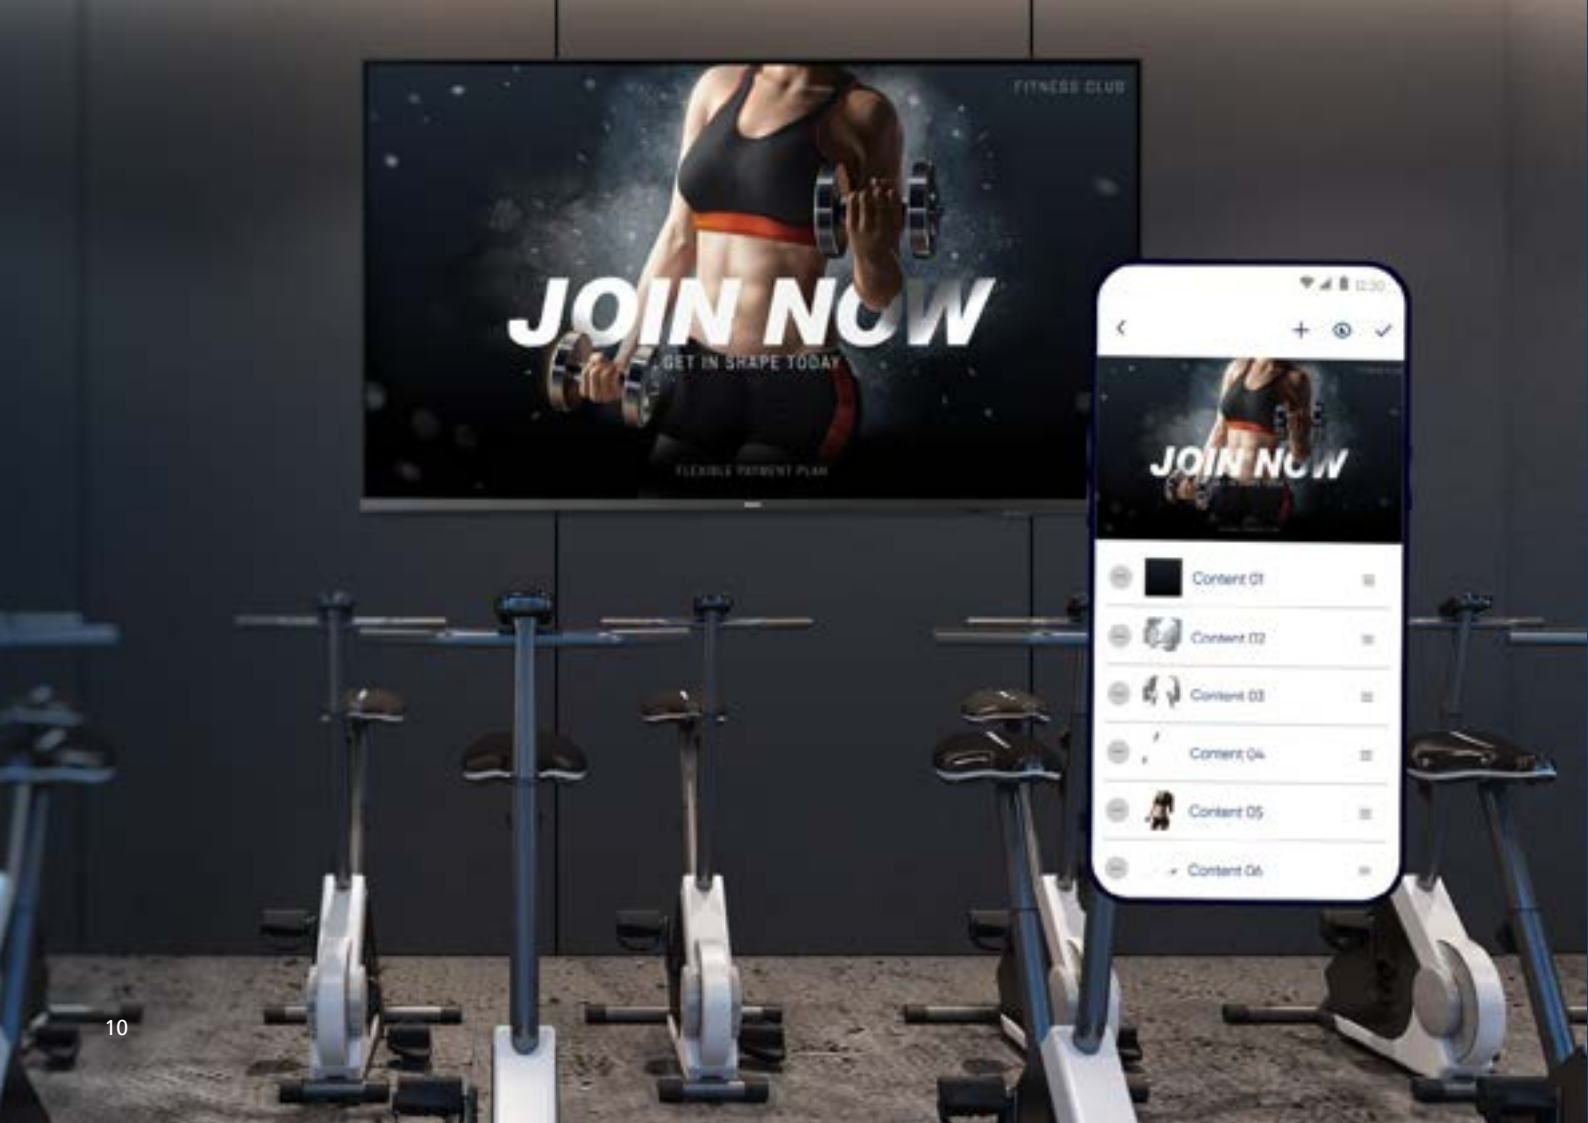

Healthcare

Whether in the waiting rooms in a hospital, a medical centre or a doctor's, dentist's or optometrist's surgery, making sure patients are comfortable while also providing them with useful healthcare information is easy with PPDS Publisher on Philips Business TVs.

Why choose PPDS Publisher with your Philips Business TV?

Whatever your industry, providing your customers with relevant and timely entertainment, information, offers and promotions makes great business sense. Designed with a built-in tuner to allow you to switch them on with the channels of your choice, the Philips Business TV B-Line is your versatile, connected signage solution.

And with PPDS Publisher included, you can create, control, push and schedule exciting new content to your TV, easily and intuitively with your own device – whenever you want, wherever you are.

Philips Business TV B-Line

Professional productivity

with Chromecast built-in and HDMI hotplug

Boost productivity. The Philips Business TV seamlessly integrates into professional systems for efficient control. Chromecast built-in ensures presentations and promotions run smoothly, with instant wireless media sharing from Windows, Apple and Android™ devices.

* Sizes and models vary regionally.

Corporate

Designed for results in demanding environments, the Philips Business TV delivers the ultimate in wireless and wired connectivity for quick, hassle-free presentation and content sharing. Extra tools and functionality can be added easily through the Google Play store, thanks to the built-in Android TV.

Food and beverage

Schedule content and promotions based on time of day, as well as special events to maximise results within your establishment. CMND & Control allows you to perform vital functions like controlling settings, updating software, and monitoring display status.

Philips Signage 4000 Series D-Line

Captivating innovation

Powered by Android

Amaze your guests with a smarter, faster signage display. Performance meets versatility in the Philips Signage 4000 Series D-Line - 24/7 and ranging up to 98" in size, it is the perfect choice for content that needs to make a powerful impact in both landscape and portrait orientation. With integrated WiFi and designed for running Android apps, meet the next evolution in signage solutions.

32"	43"	50"	55"
65"	75"	86"	98"

Public venues

Inform and engage visitors in public spaces. The Philips Signage 4000 Series D-Line features an integrated system to communicate with devices over the same network connectivity. FailOver ensures that backup content is played if the primary source experiences an outage.

Retail

Optimise any retail space for a better shopping experience. Easily create and control promotional content across single or multiple displays with PPDS Wave, and ensure content is always playing despite primary source outages with FailOver.

Corporate

Easily connect and share content for ultra efficient meetings and presentations. Built-in Android and SmartBrowser provide access to more apps, media content and devices, while PPDS Wave allows for updateable internal communications in an instant.

Food and beverage

Easily display menus, update item availability, pricing, and promotions with PPDS Wave. Integrated SmartPlayer and internal MemoryCache allow for local content scheduling, while FailOver ensures backup content is always available.

Transportation

Instantly update arrivals, departures, and important announcements with ease using PPDS Wave. Built-in Android allows for live information and custom software integration from apps, while FailOver displays backup transport information in case of a primary source outage. All this with 24/7 operation.

Philips Tableaux

Full colour, zero power ePaper technology

Powered by PPDS Wave

Philips Tableaux ePaper displays open a new era of signage technology, delivering power-free paper poster replacement opportunities to businesses everywhere.

Using zero power to show static images in up to 65,000 stunning, vibrant colours...indefinitely. And needing only super low power to swap to a new image.

13"

25"

32"

* 32" available from H2 2024.

Retail

Whether for wayfinding around your store, directing your shoppers to the departments they need, for up-to-the-moment messaging and ad hoc advertising, or for point of sale promotions that can be changed with the weather, Philips Tableaux can be positioned without the need for access to a power supply, delivering the ultimate in versatility and sustainability.

Food & beverage

Make your menu boards pop with full colour content that can be set for your sittings. Positioned by the entrance of your restaurant, over or on the counter at your cafe, or above the bar in your establishment, Philips Tableaux have no need for a power supply until you need to change the image. A flexible, fuss-free, more environmentally friendly display for your food and beverage business.

Public venues

Showcase a sustainable and eye-catching masterpiece in up to 65,000 colours with Philips Tableaux - ideal for positioning in public venues, including museums, libraries, galleries, theatres, and stadia, with no need for a power supply until you are switching the picture. Deliver information, wayfinding, promotions and more, replacing paper-based displays without wasting natural resources.

Healthcare

An antimicrobial case minimises the spread of germs and allows for easy cleaning, while nurse-call system compatibility allows easy control of the TV and access to medical assistance from a single device.

CMND enables instant patient information updates, and Chromecast built-in helps keep a comfortable setting by allowing patients to cast content from their mobile devices.

Galvanic isolation ensures a fail-safe separation of the headphone connector from the electrical environment near the patient's bed.

A reading light is conveniently placed under the bottom bezel of this Philips professional healthcare TV, giving patients the freedom to read - day or night. The light is operated by a button on the front touch control panel: the button illuminates when a finger or hand is near it.
