## STEP 2

### SCHEDULING PROGRAMS

01. Schedule Content based on days of the week, any date and time in advance
02. Add different content programs to the schedule based on any requirement
03. Individual displays can have their own schedules set with the location's specific content programs

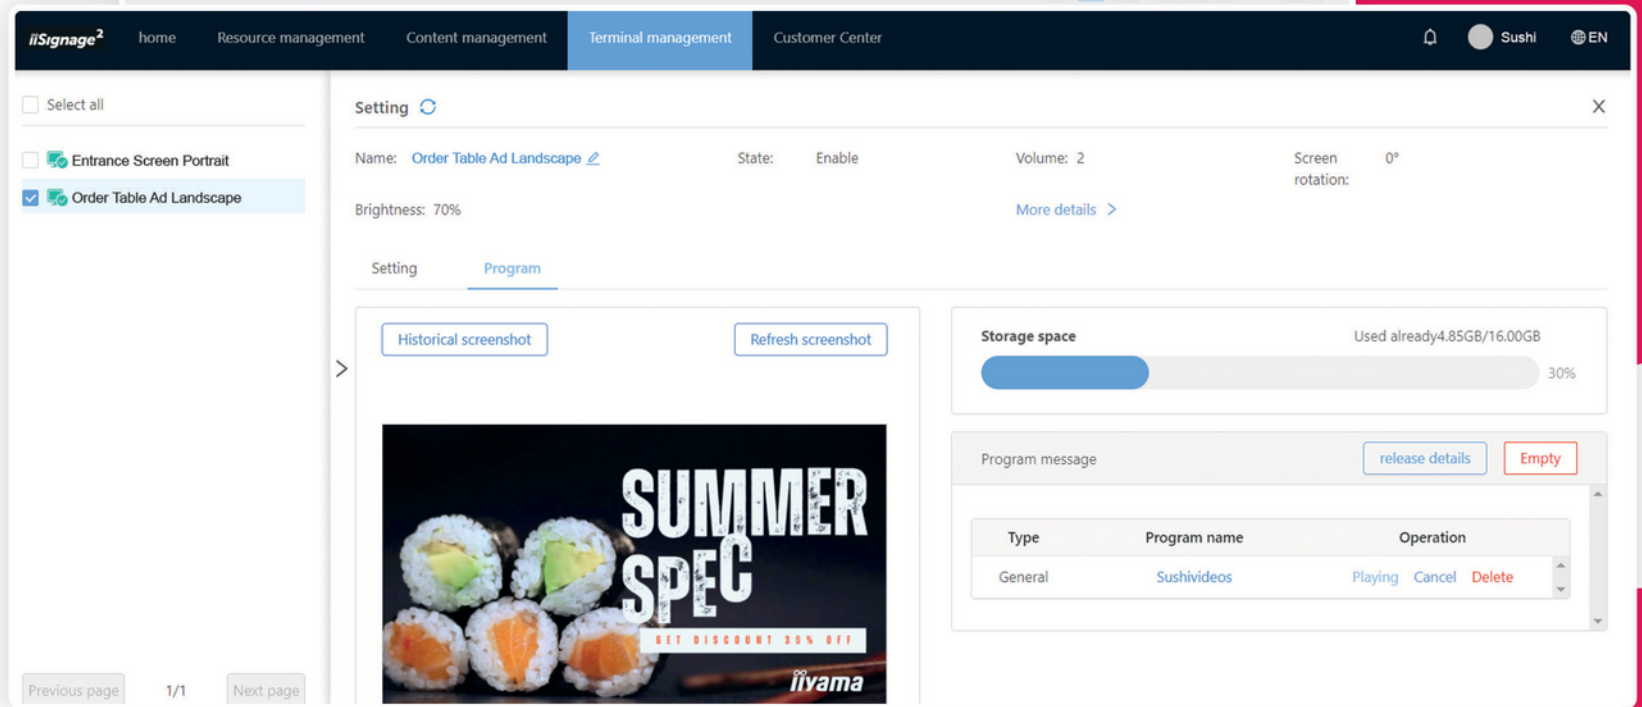

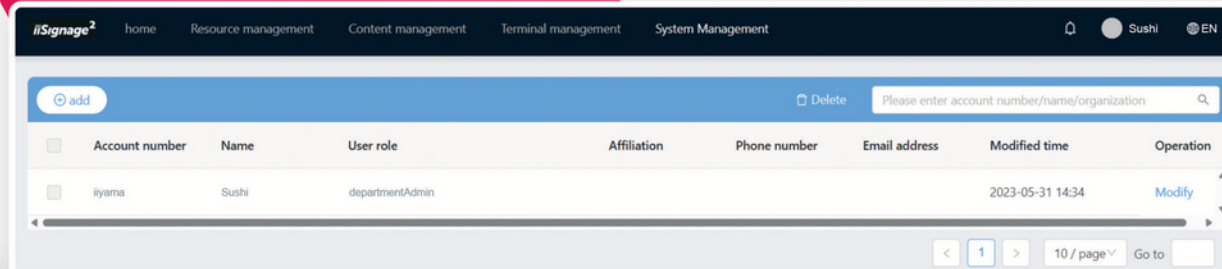

The screenshot shows the iiSignage² web interface. The top navigation bar includes 'home', 'Resource management', 'Content management', 'Terminal management' (highlighted), and 'System Management'. On the right, there are a notification bell, a user profile 'Sushi', and a language selector 'EN'. Below the navigation, there are several buttons: 'My organization' (dropdown), 'Setting', 'Strategy' (active), 'Auto connect', and 'Export all terminal information1 units'. On the right side of this bar, there are status indicators: 'Totally 5 units', 'Online 2 units', 'Standby 0 units', 'Offline 3 units', 'Not enough points 0 units', and 'Disable 0 units'. A search bar and a 'Filter' button are also present. The main content area is a table with the following columns: Name, Type, MAC address, IP address, Group, and Operation. The table contains five rows of terminal units. The 'Operation' column for each row has links for 'Details', 'Setting', and 'Program'. At the bottom right of the table, there are navigation controls: '<', '1', '>', '10 / page', and 'Go to'.

<input type="checkbox"/>	Name	Type	MAC address	IP address	Group	Operation
